
(a) Whole-PSU folds
stratum 1
stratum 2
stratum 3
PSU not sampled
fold 1
fold 2
sampled units
other units
(b) Two variance scales
σ_m^2: variance targeted by the usual survey SE^2
$\sum_h (1 - f_h) B_h$
$\sum_h f_h B_h$
$\sum_h V_h$
$\sigma_{m,\mathrm{wor}}^2$: without-replacement variance of the leading term
$\sum_h (1 - f_h) B_h$
$\sum_h V_h$
$\Delta_m = \sum_h f_h B_h$
